WORK EXPERIENCE

SYSTEM DEVELOPER (FULL STACK DEVELOPER)

K-COOP

September 2023 - Present

- Design, develop, and implement new website modules using Ruby on Rails, following the MVC architecture, based on project requirements and set timelines
- Work primarily with Ruby on Rails, with additional front-end support using React, HAML, and JavaScript when needed.
- Maintain and update existing modules to ensure optimal functionality, security, and compatibility across the system.
- Develop and consume internal APIs within the system (non-third party) to support module features and data integration.
- Identify, troubleshoot, and resolve bugs or technical issues within modules to maintain stable and efficient system performance.
- Manage system error tickets, perform root-cause analysis, and implement effective fixes to ensure smooth module operation.

SKILLS & KNOWLEDGE

- Ruby on rails, ReactJs
- JavaScript/HTML/CSS/HAML
- Vb.net/Vb6, Java
- MySQL, PostgreSQL
- Able to use different operating systems such as Windows or Linux (Ubuntu)
- MVC Architecture
- Background job processing (Sidekiq / ActiveJob)
- Code refactoring & maintaining clean code
- Git & GitHub (version control, branching, pull requests)
- API Testing using Postman (Internal API)
- Bash/Terminal usage
- Writing readable, simple maintainable code.
- Team collaboration and knowledge-sharing.

CERTIFICATIONS
